

Adding content blocks to a page

Category: Content Blocks

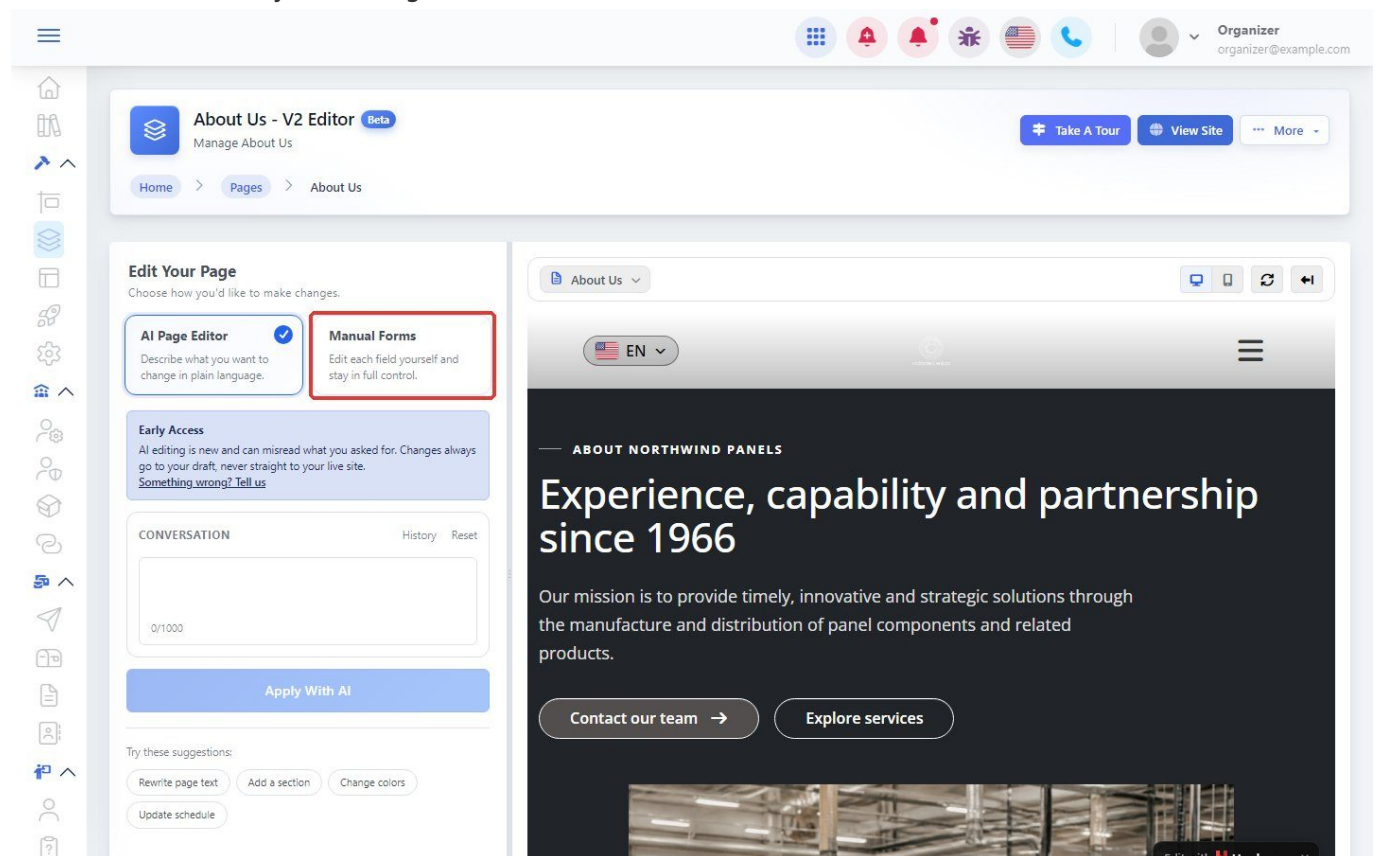

Published: Oct 26, 2026

Reading Time: 1 min

Pages are built from blocks: text, images, galleries, FAQs, buttons and more. Here is how to add one.

Step 1: Open the editor and choose Manual Forms

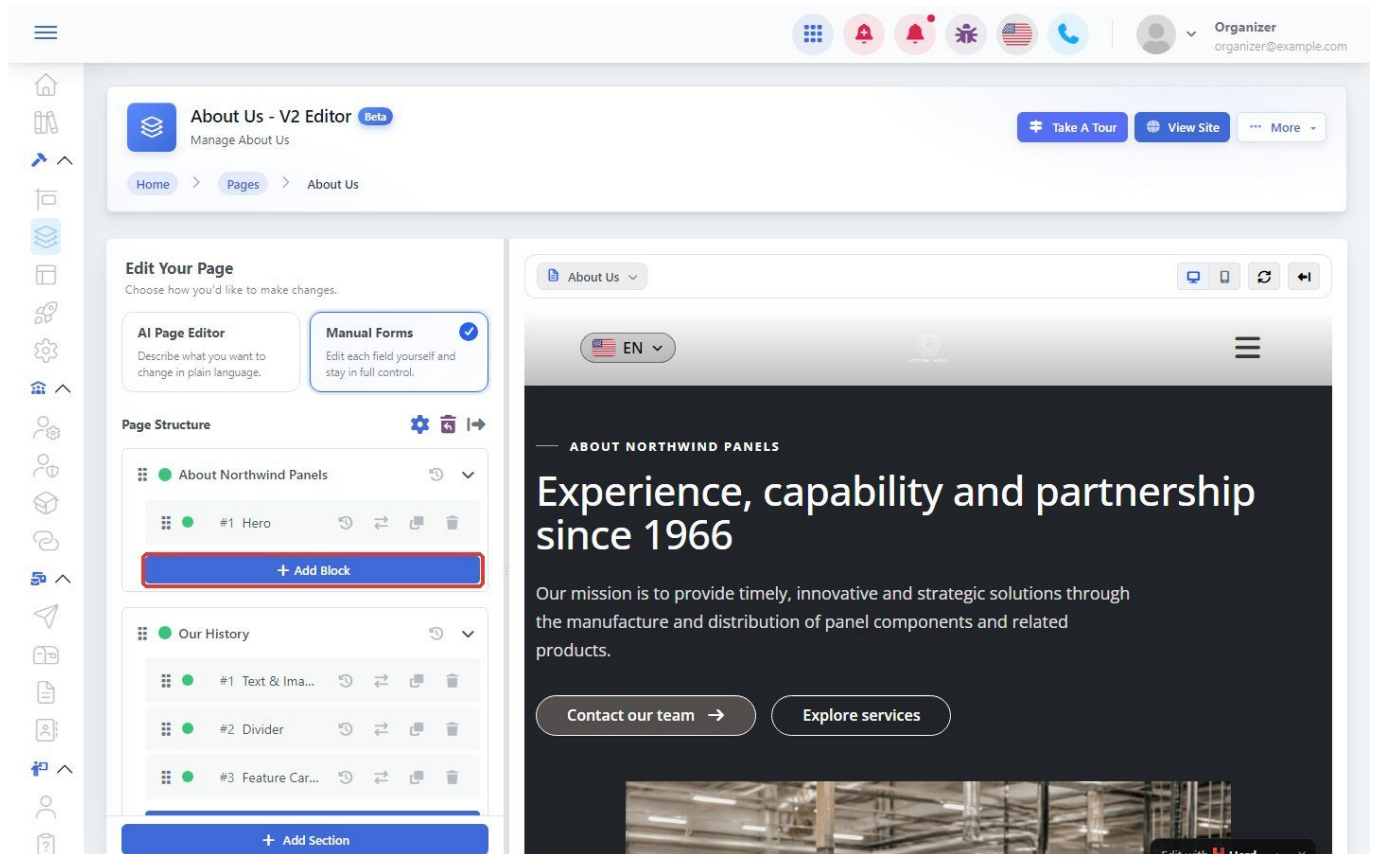

In **Pages**, click **New Editor** next to your page. Choose **Manual Forms**. (Choose **AI Page Editor** instead to describe your change in words.)

Choose Manual Forms.

Step 2: Click Add Block

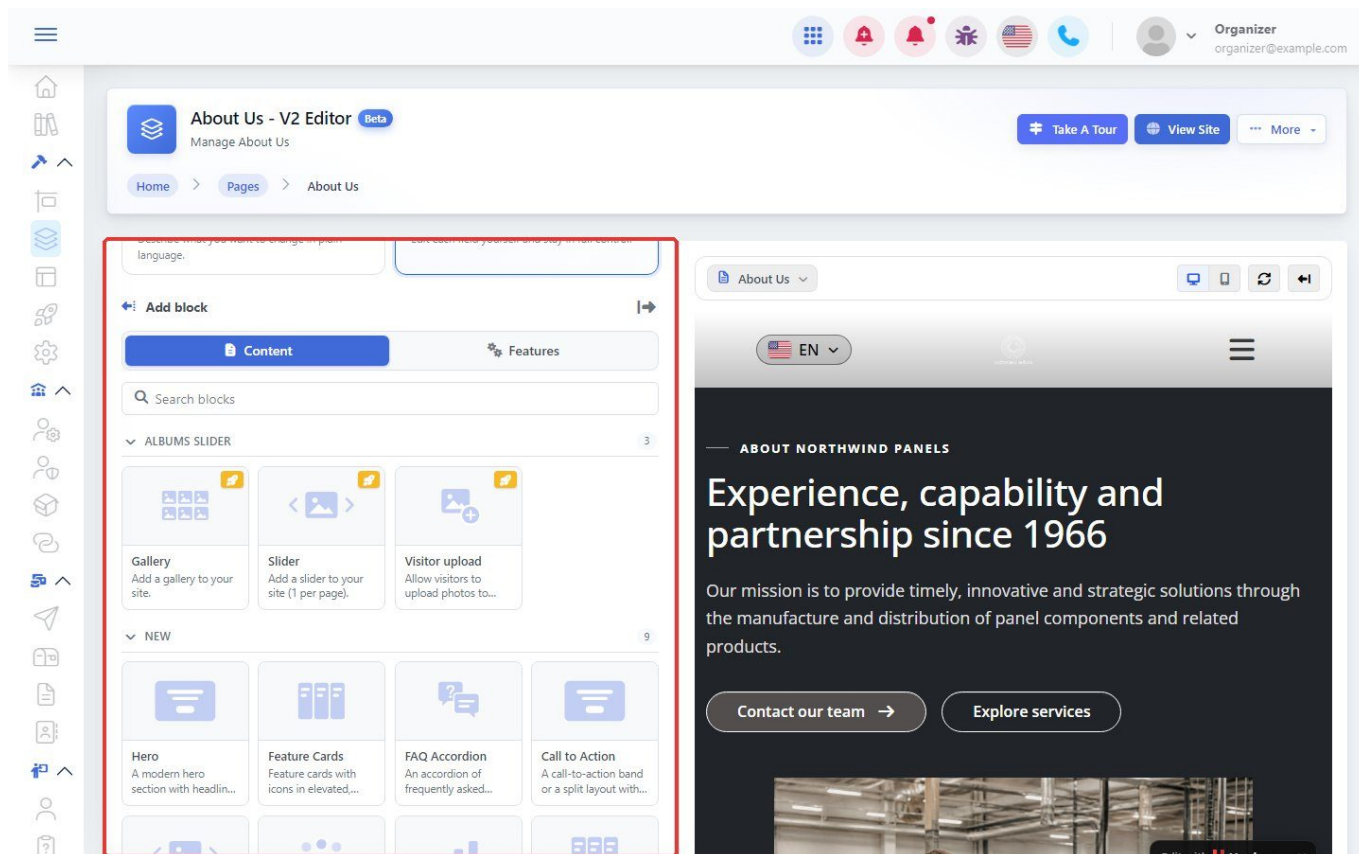

In **Page Structure**, click **Add Block** in the section where the block should go. You can also click **Add Section** to start a new section.

Click Add Block.

Step 3: Choose a block

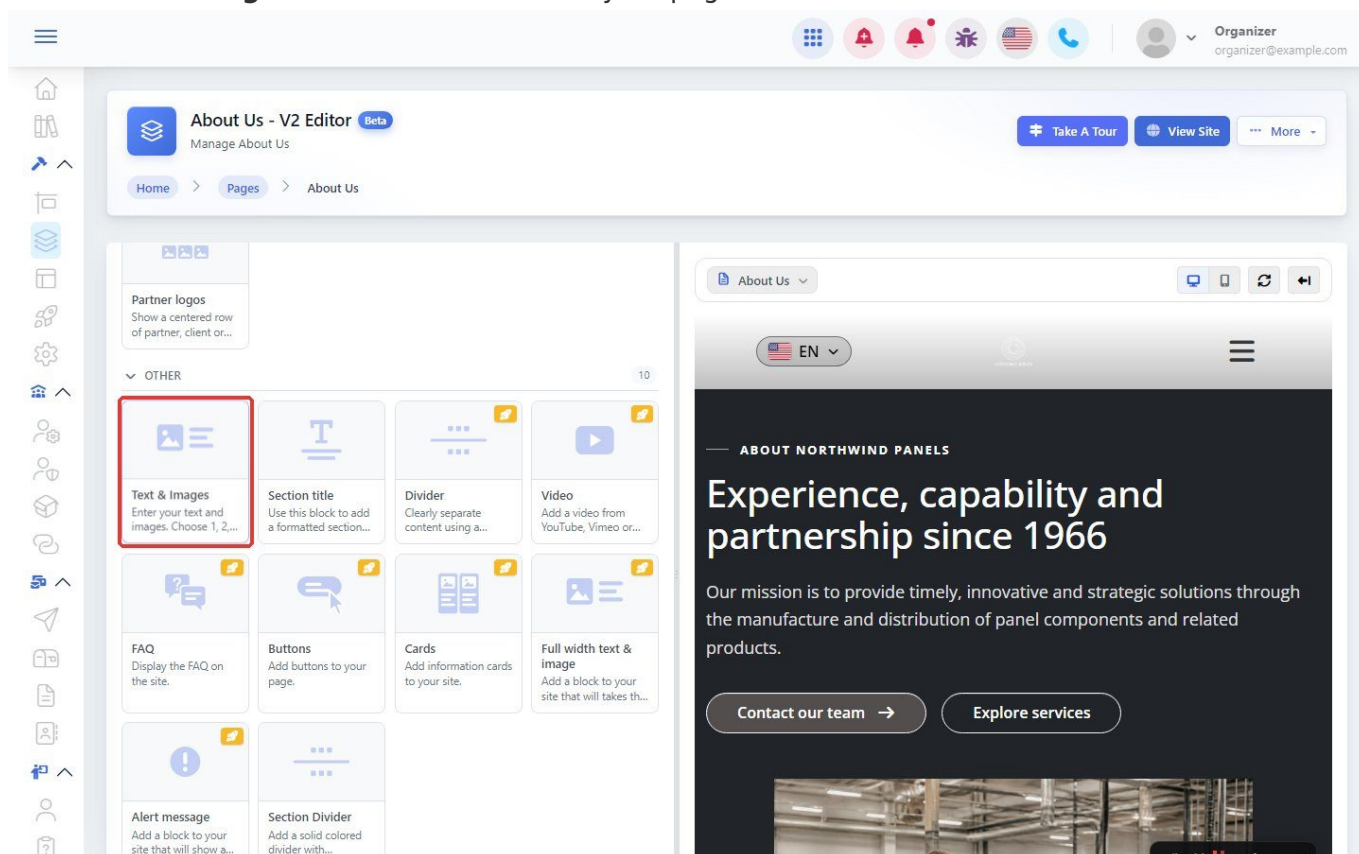

Browse the **Content** and **Features** tabs, or type in **Search blocks**. Blocks include Hero, Feature Cards, FAQ Accordion, Call to Action, Meet the Team, Pricing, Text & Images, Video, Buttons and photo album blocks.

Pick a block.

Step 4: Add a Text & Images block

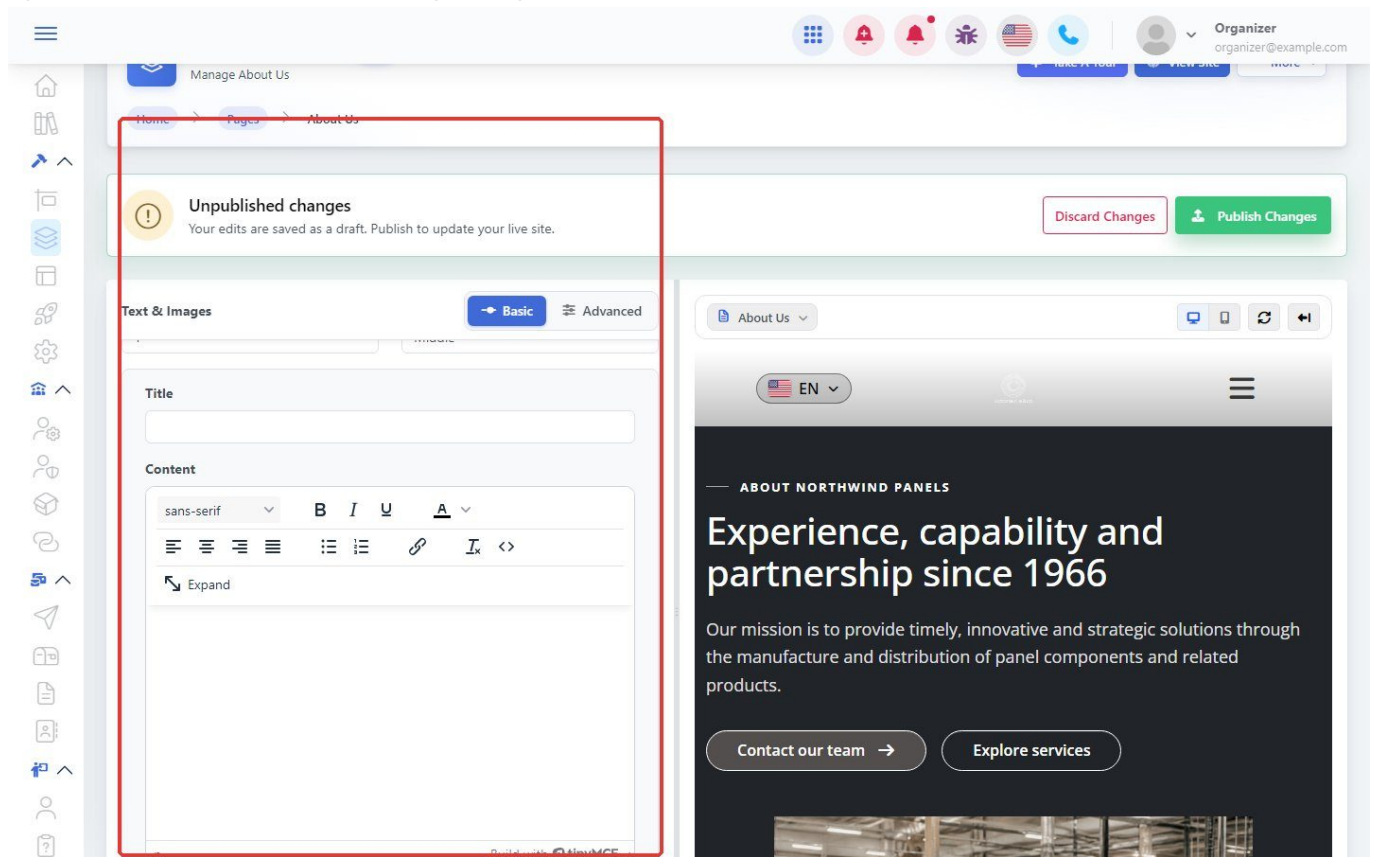

Click **Text & Images**. The block is added to your page.

Click Text & Images.

Step 5: Fill in the block

In **Block Settings**, enter your title and text and upload an image. The **Basic** tab has the main options; **Advanced** has extra layout options.

Fill in the block.

Step 6: Publish

Click **Publish Changes** to make the block live, or **Discard Changes** to remove your draft.
