

Adding links and sub-menus to your menu

Category: Header & Menu

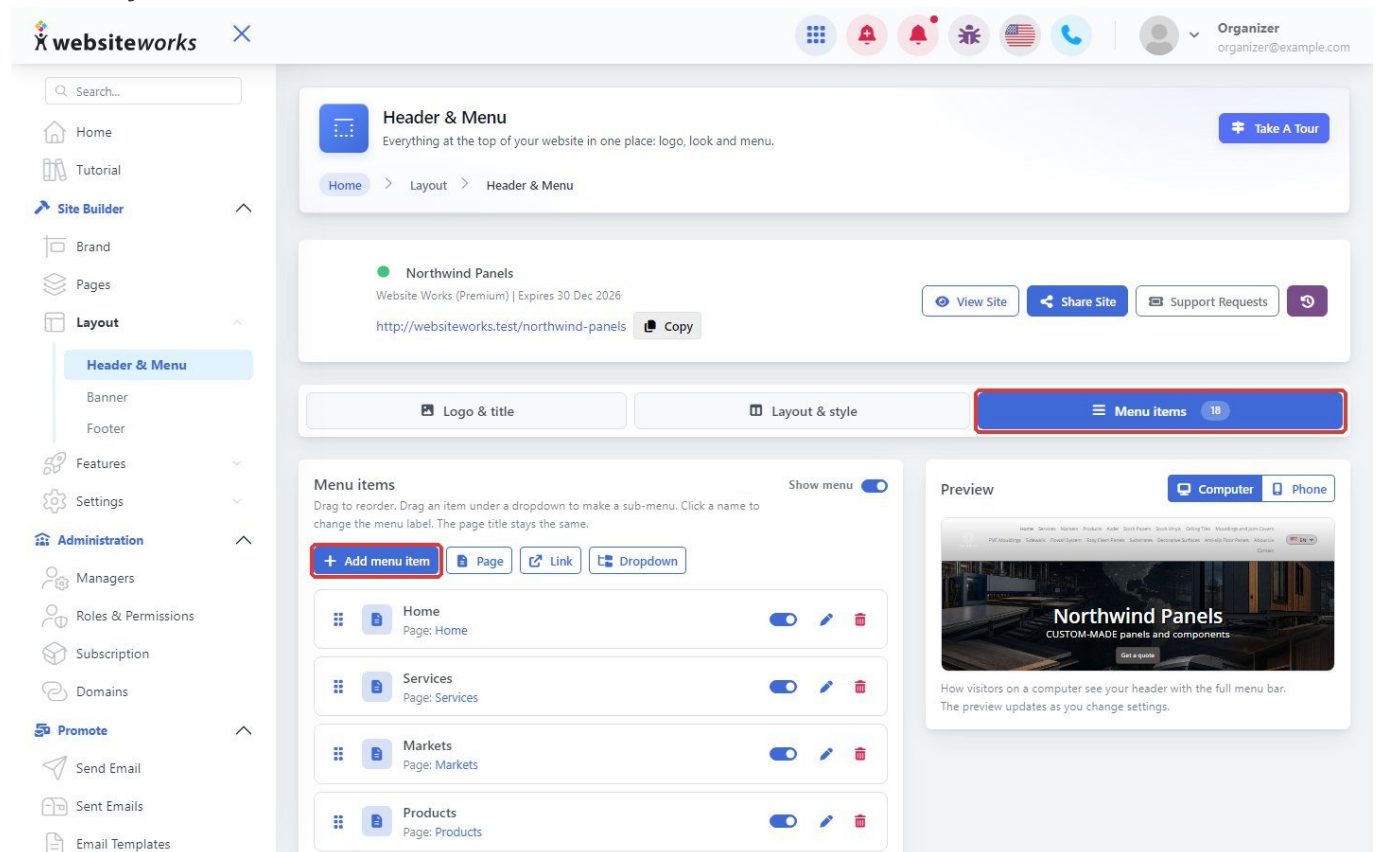

Published: Oct 26, 2026

Reading Time: 1 min

Your menu can link to your pages, to other websites, and can have dropdowns with sub-menus.

Step 1: Open Menu items

Go to **Layout → Header & Menu** and click the **Menu items** tab. Click **Add menu item**.

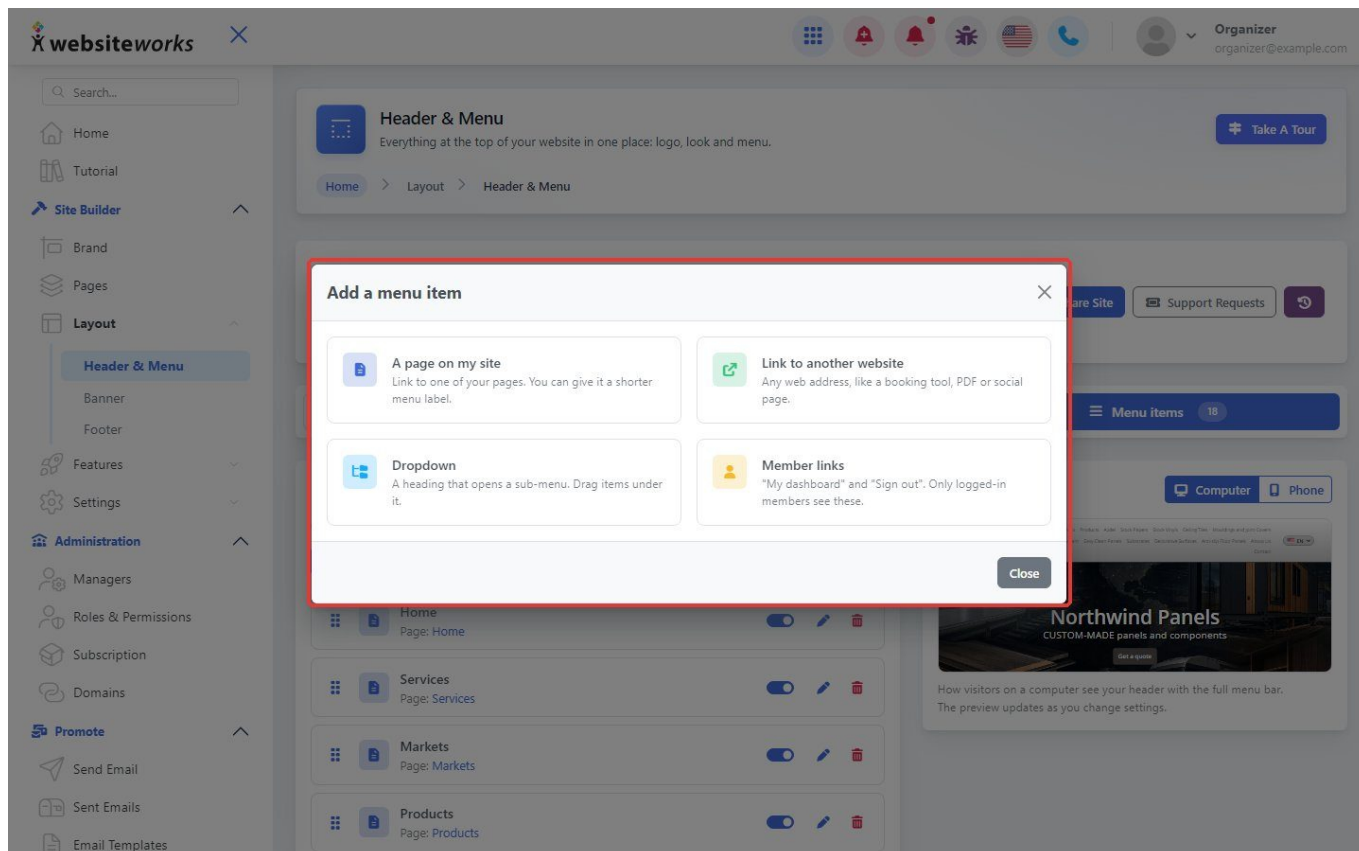

The screenshot shows the Website Works interface. On the left is a sidebar with a search bar and navigation links: Home, Tutorial, Site Builder, Brand, Pages, Layout, Header & Menu (selected), Features, Settings, Administration, Managers, Roles & Permissions, Subscription, Domains, Promote, Send Email, Sent Emails, and Email Templates. The main area is titled 'Header & Menu' with a subtitle 'Everything at the top of your website in one place: logo, look and menu.' and a 'Take A Tour' button. Below this is a section for 'Northwind Panels' with a 'View Site' button, a 'Share Site' button, and a 'Support Requests' button. The 'Menu items' tab is selected, showing a list of menu items: Home, Services, Markets, and Products. Each item has a toggle, an edit icon, and a delete icon. The 'Add menu item' button is highlighted. On the right is a 'Preview' section showing a computer and phone view of the website header.

Click Add menu item.

Step 2: Choose the type of item

In **Add a menu item**, choose:

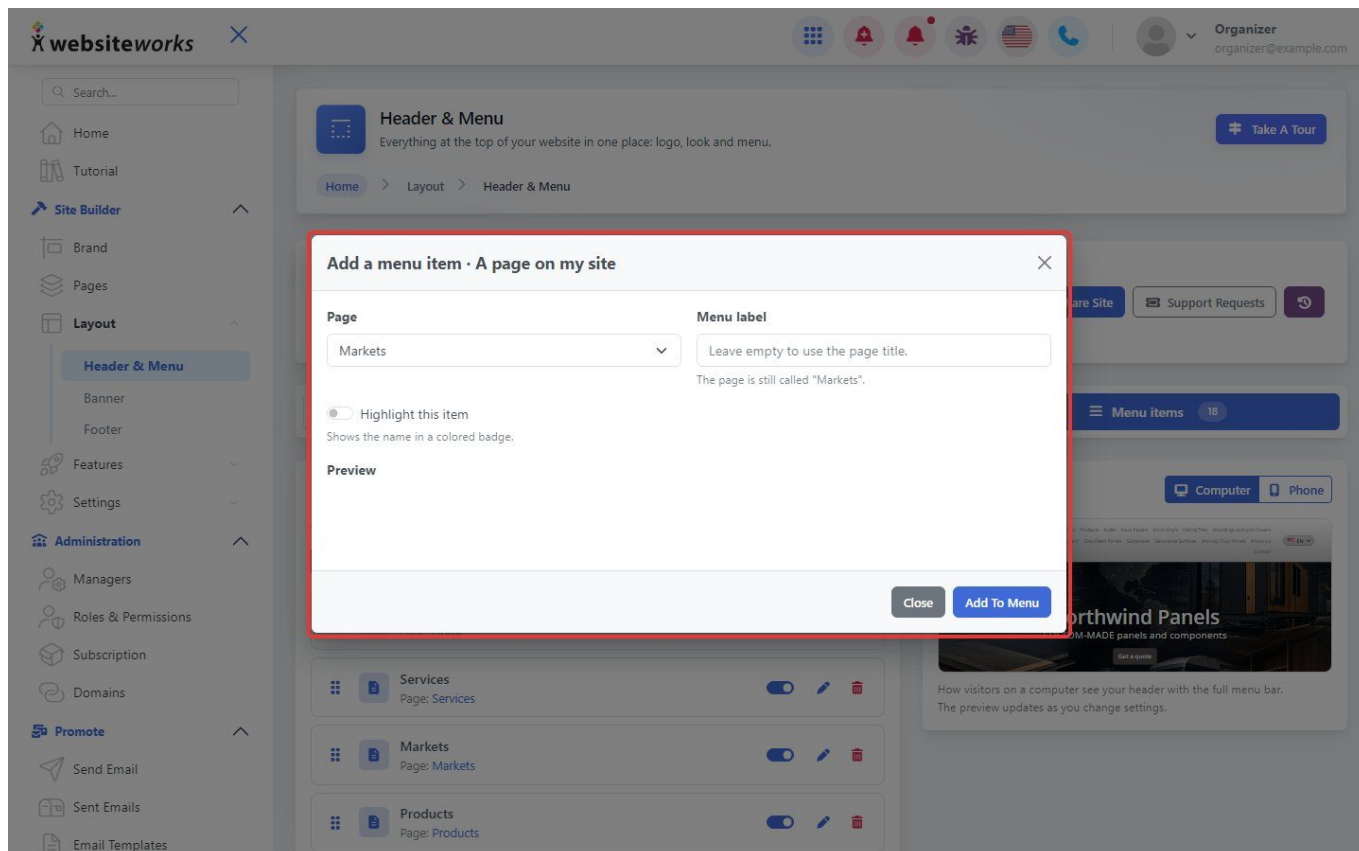

Choose the type of item.

- **A page on my site:** link to one of your pages.
- **Link to another website:** any web address.
- **Dropdown:** a heading that opens a sub-menu.
- **Member links:** "My dashboard" and "Sign out", shown only to members.

Step 3: Add a page

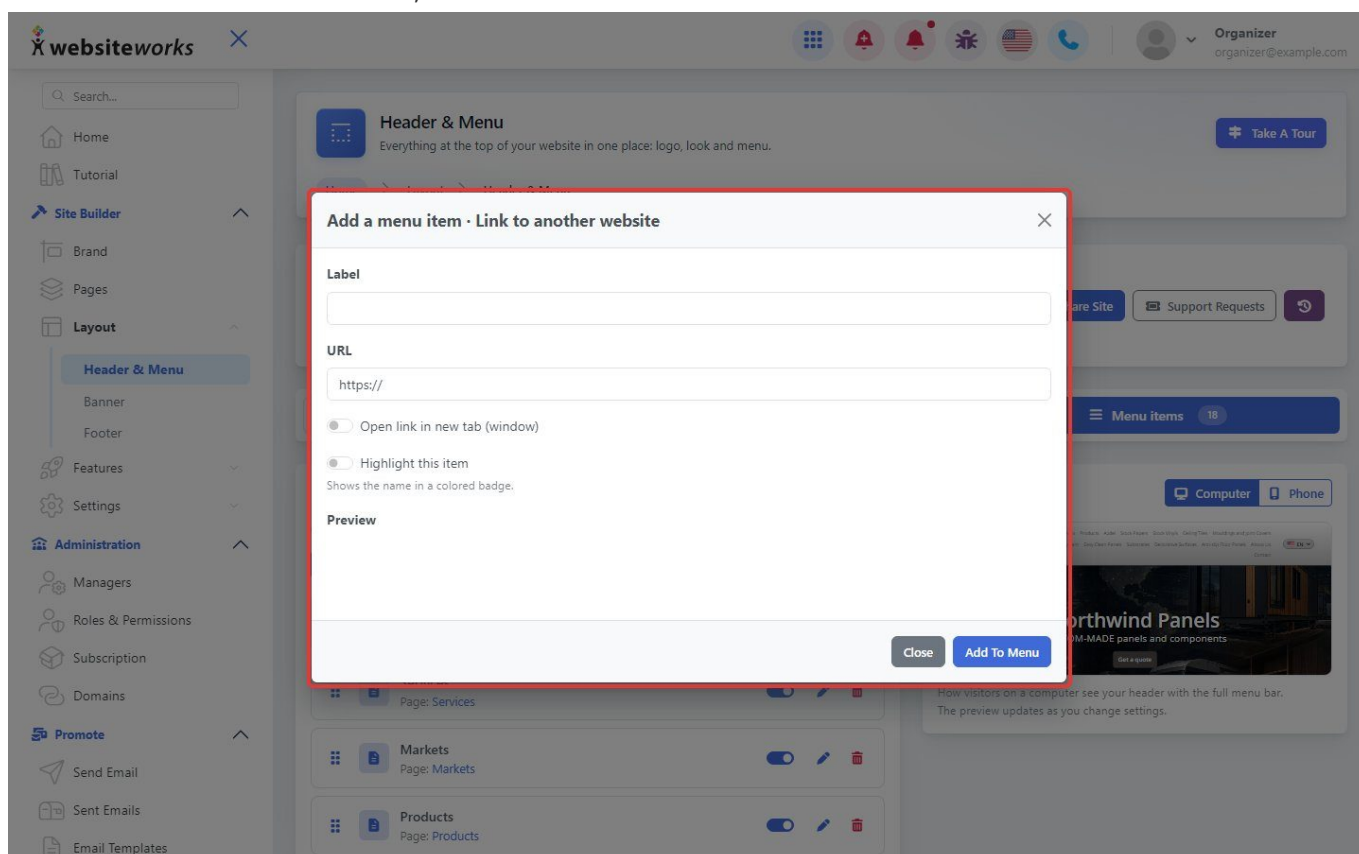

For **A page on my site**, choose the page and, if you like, a shorter menu label. Click **Add To Menu**.

Pick a page.

Step 4: Add a link

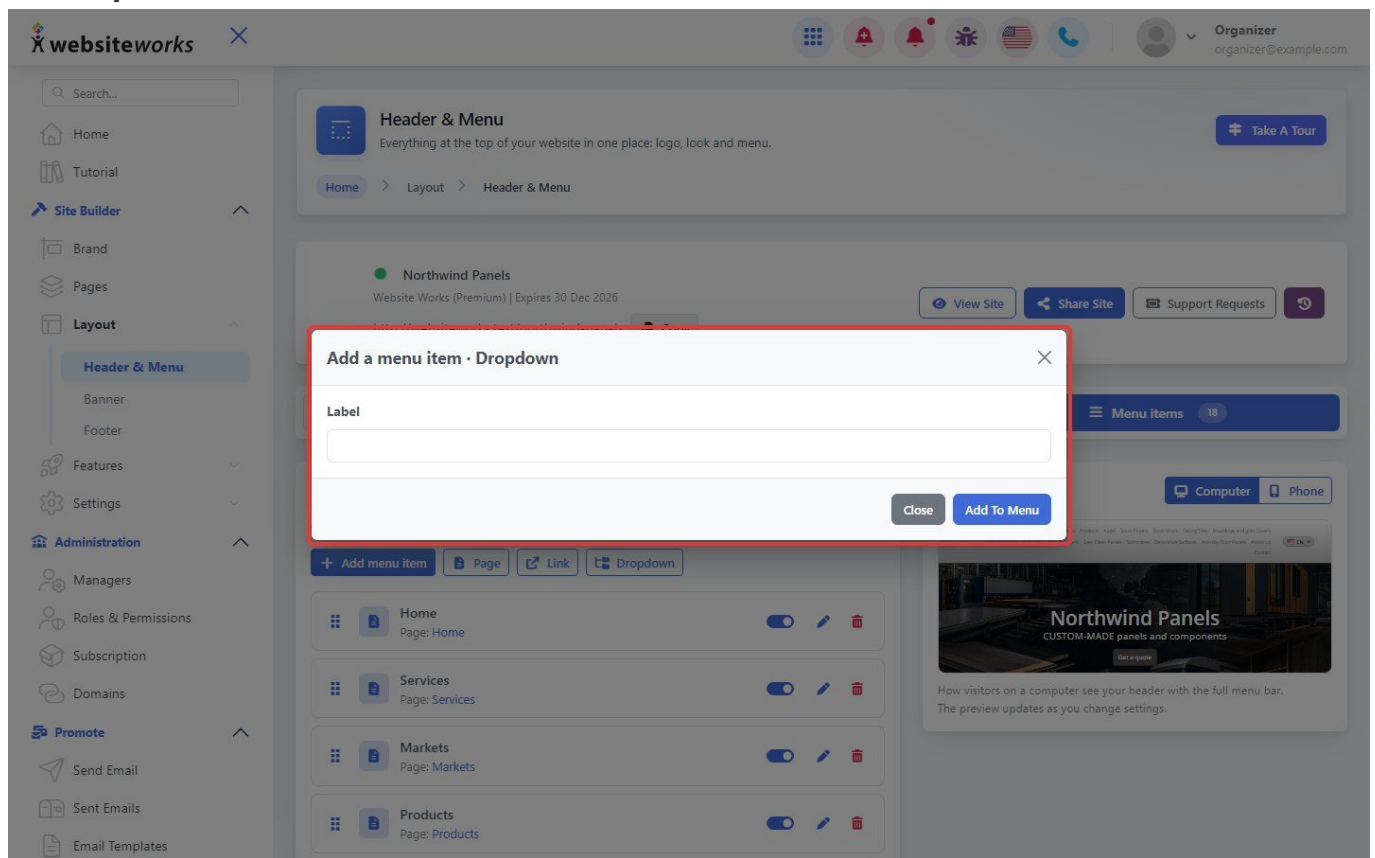

For **Link to another website**, enter the label and the web address. Click **Add To Menu**.

Enter the link.

Step 5: Add a dropdown

For **Dropdown**, enter its label and click **Add To Menu**.

Name the dropdown.

Step 6: Build sub-menus

Drag an item under a dropdown to make a sub-menu. Drag items up or down to reorder them, then click **Save changes**.
