Reading Time: 2 min

Your plan decides which features your website has. On the **Subscription** page you can see your current plan, compare durations and subscribe.

Step 1: Open Subscription

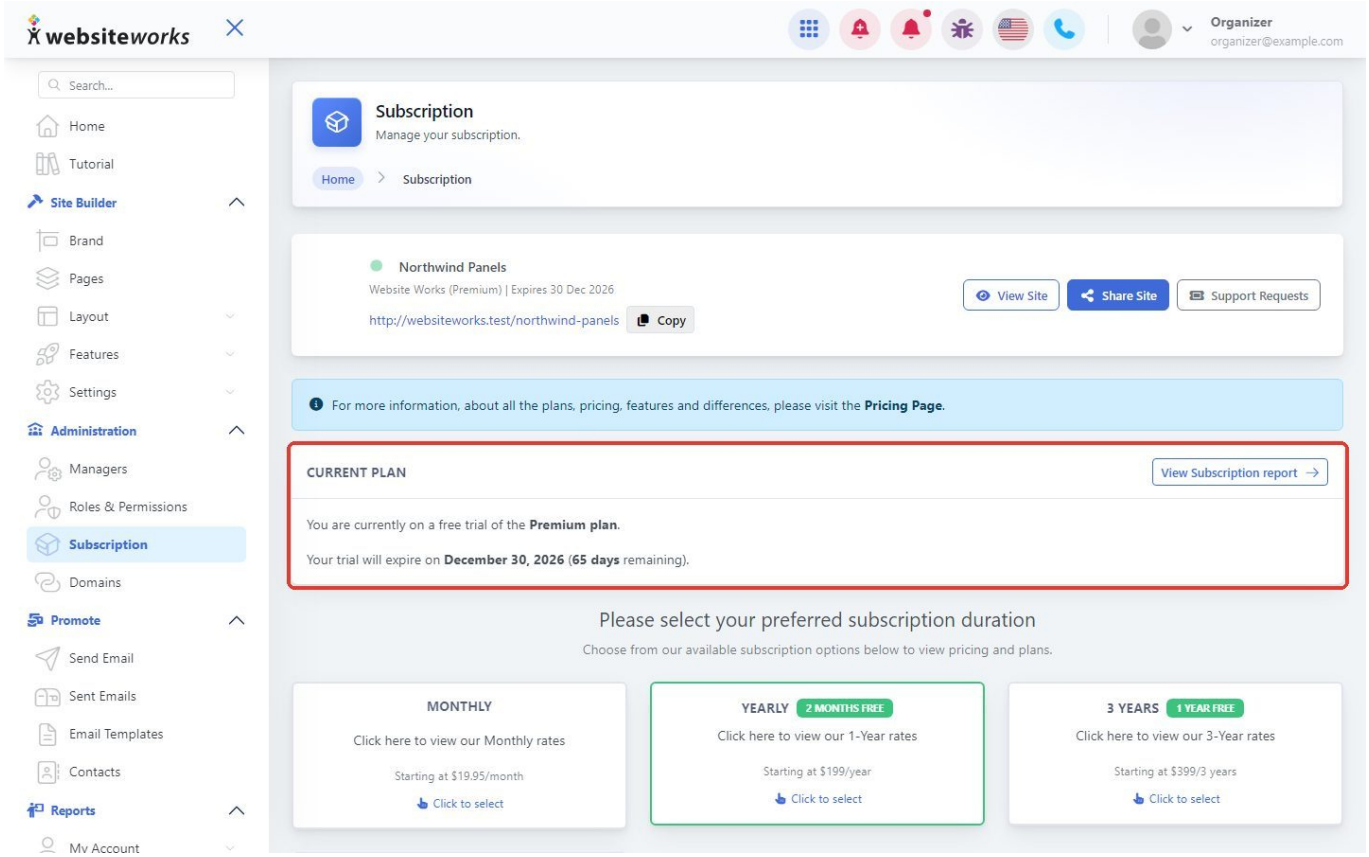

In the menu, under **Administration**, click **Subscription**.

Open Administration > Subscription.

Step 2: Check your current plan

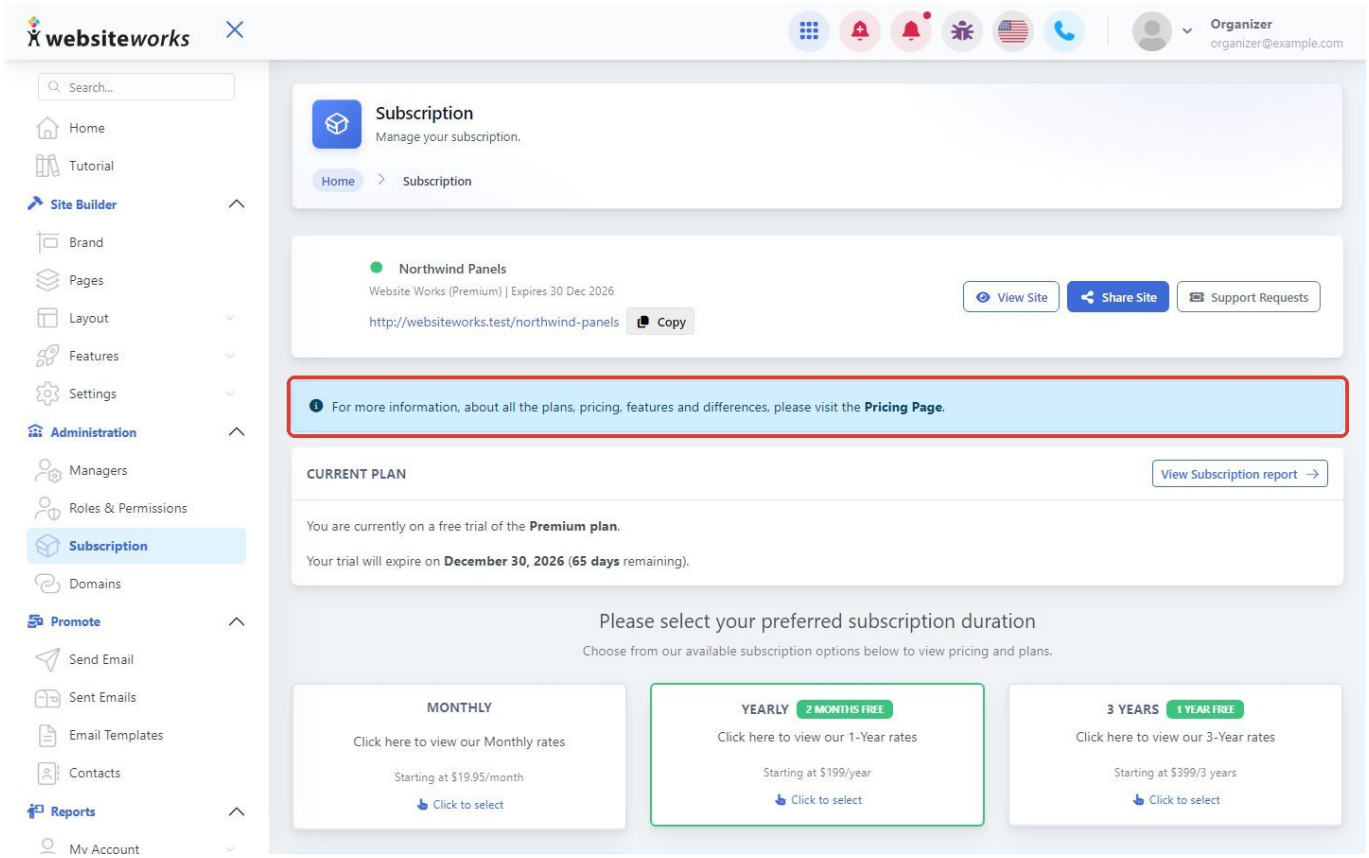

The **Current Plan** box shows which plan you're on. If you're on a free trial, it also shows the day your trial ends. Click **View Subscription report** to see your past payments.

Your current plan and trial end date.

Step 3: Compare the plans

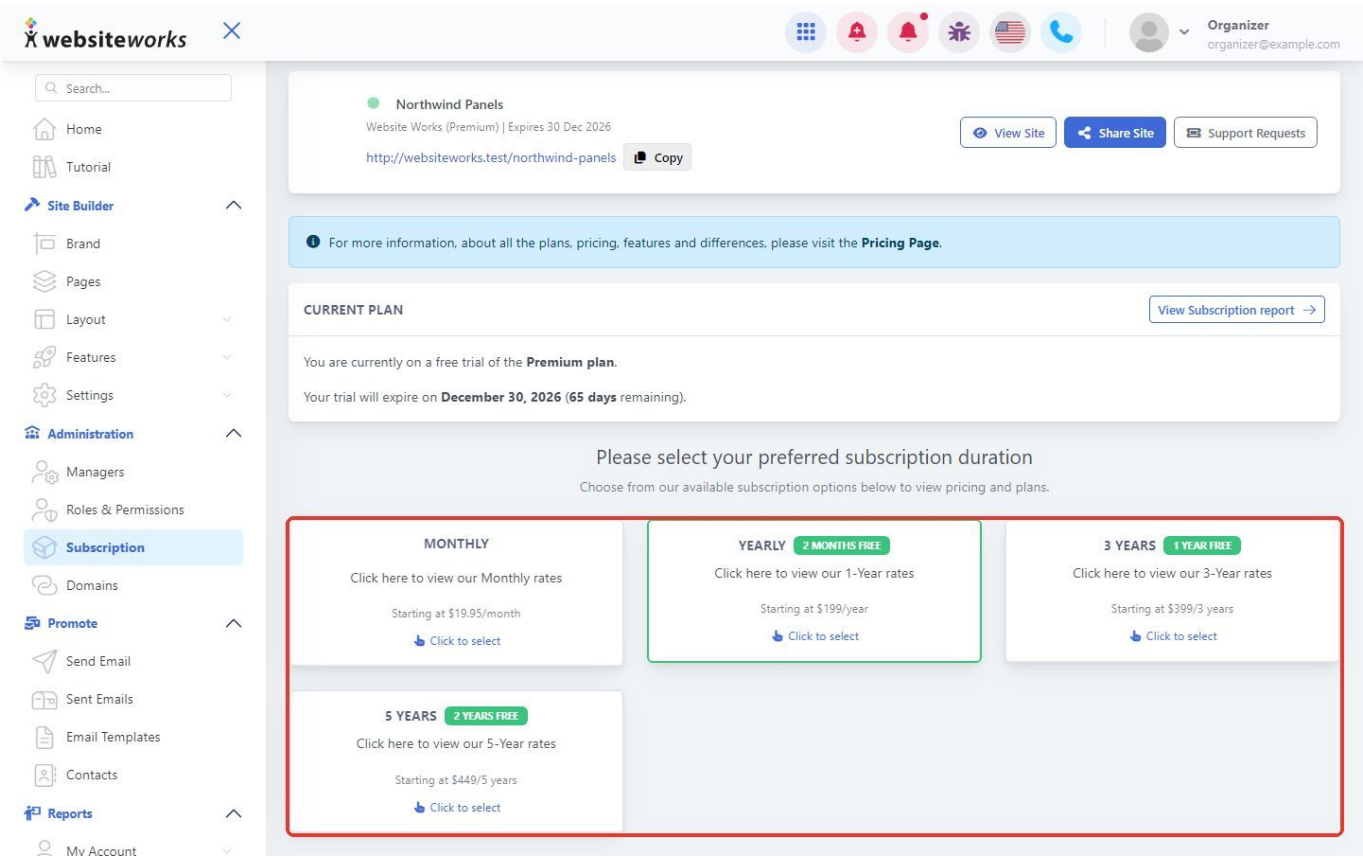

To see everything each plan includes, click the **Pricing Page** link in the blue box at the top.

Click Pricing Page to compare all plans.

Step 4: Choose how often you pay

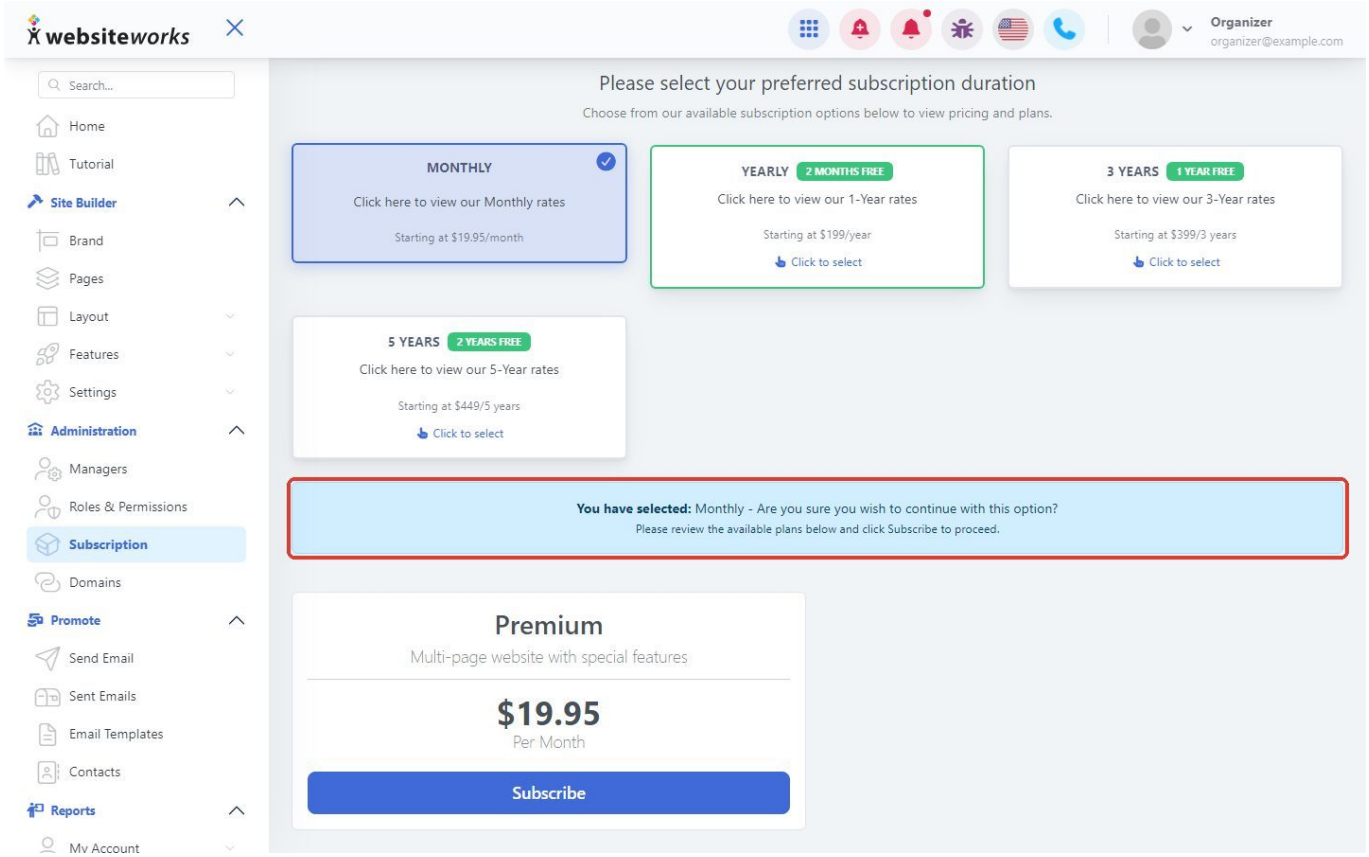

Under **Please select your preferred subscription duration**, pick **Monthly**, **Yearly**, **3 Years** or **5 Years** and click **Click to select**. Longer durations save you money: Yearly gives you 2 months free, 3 Years gives you 1 year free and 5 Years gives you 2 years free.

Pick how often you want to pay.

Step 5: Confirm your choice

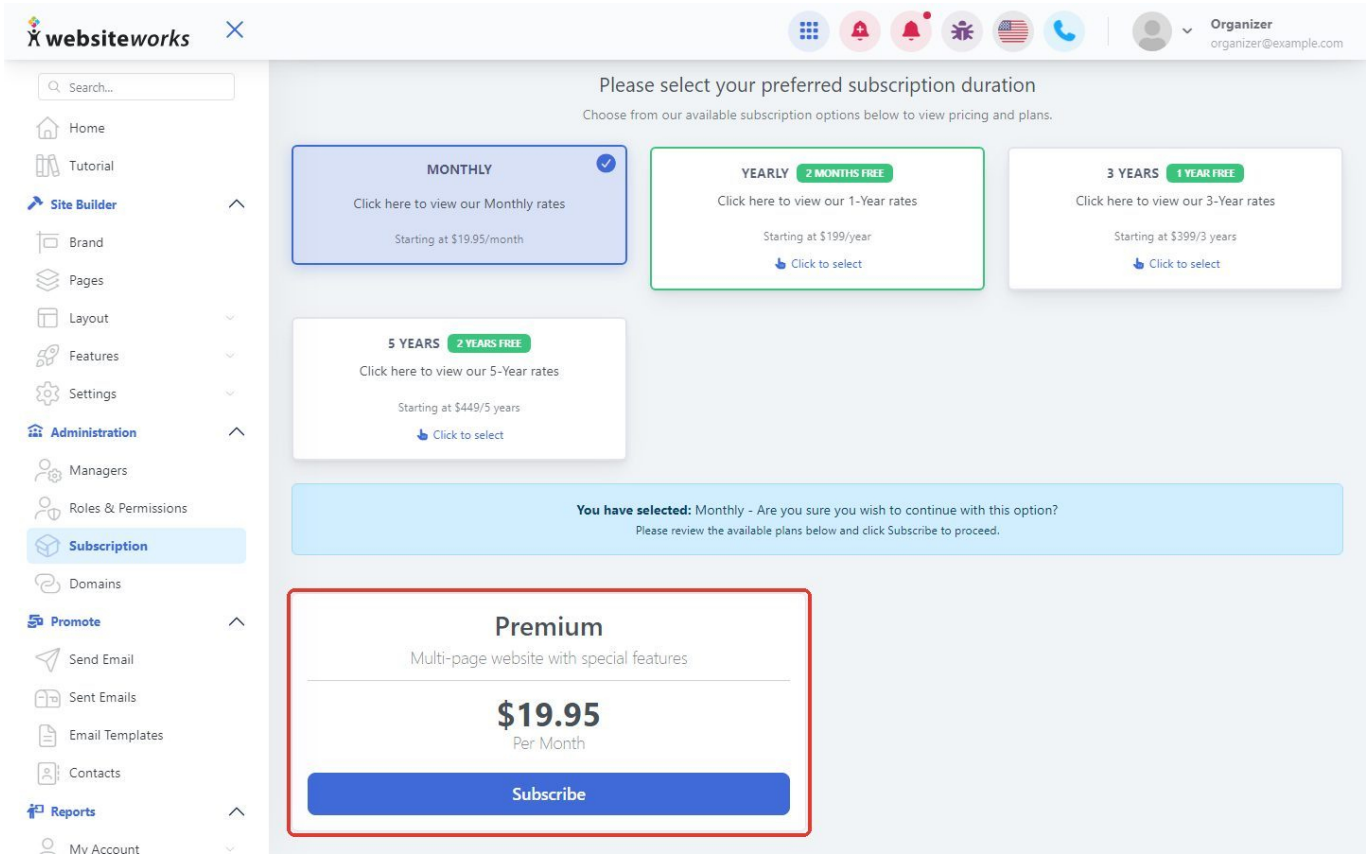

A message shows the duration you picked, for example **You have selected: Monthly**. Want a different one? Just click another duration.

Check the duration you picked.

Step 6: Subscribe

Review the plan below and click **Subscribe**. You'll go to a secure payment page to enter your card details. Your plan starts as soon as the payment goes through.

Click Subscribe to go to the payment page.

Changing a plan you already pay for

If you already have a subscription, the **Subscription** page shows a **Manage Subscription** button instead. Click it to change your plan, update your card or change your auto-renewal. You can also contact our support team for help.

Good to know:

- If you see **Subscription Past Due!**, your last payment didn't go through. Click **Manage Subscription** to update your card.
- Your custom domain is not included in your subscription. To renew it, go to **Administration** > **Domains**.
- If you cancel, your plan stays active until the end of the current billing period.
